ABSTRACT

This study was designed to determine salaries being paid to the incumbents of 46 selected professional administrative positions in higher education, to determine the nature and dollar value of non-cash and total compensation, to investigate the compensation relationships among positions, and to examine the nature of professional administrative staff compensation. Survey forms returned by 975 institutions were followed up by telephone conversations to ensure complete understanding and accuracy of response. Results are categorized according to 1973-1974 cash compensation, trend of cash compensation, frequency of occurrence, dollar value of non-cash compensation elements, total compensation, relative value of total compensation, intrainstitutional cash compensation relationships, intrainstitutional total compensation relationships, and relative factors in administrative compensation. Appendices include summary position descriptions, instructions for completion of the survey form, and the survey form 1973-74. (HJH)

FOREWORD

This Survey is the fourth in the series of the College and University Personnel Association's biennial surveys on post-secondary administrative compensation. The Survey is more than a tabulation of salaries. It is in handbook form and provides guidance on how to use and how not to use the data presented. Moreover, the Survey recognizes that there is a wide range of compensation information needed by the hundreds of junior colleges, senior colleges and universities in the United States. Accordingly, there are eighty-seven tables arrayed by the type of institution, size, and budget for use by chief executives and their salary administrators.

An undertaking of the scope and detail contained in this survey can only be accomplished with the cooperation and assistance of many helpful persons. Special recognition must be given to Mr. William E. Moser, Jr. and Mr. Roger A. Mastrude who are most responsible for the production of this Survey. Mr. Moser managed the collection, verification and codification of data, and performed most of the editorial and production responsibilities. Mr. Mastrude is responsible for the major task of reprogramming the existing computer programs to our University computers and had a major role in developing the formats of the tables. With their crucial and open-handed support, it was possible to meet our exacting schedules and to complete the Survey on time.

My gratitude must be given to others who assisted in this work: Ms. M. Saito and Ms. N. J. Anderson, whose typing and coding assistance were invaluable, and to other members of the Management Analysis Group staff. Their assistance was important to the development of this study and their participation is gratefully acknowledged, but all errors or oversights in this Survey must belong to the Project Director.

The College and University Personnel Association is indeed grateful for the cooperation received from all participating institutions.

David A. Concepcion
Project Director

I INTRODUCTION

PURPOSES OF THE STUDY

The purposes of this study were:

- To determine salaries being paid to the incumbents of 46 selected professional administrative positions in higher education.
- To determine the nature and dollar value of non-cash and total compensation afforded 30 of the 46 reported positions.
- To investigate the compensation relationships among positions, and between positions and selected indicators of institutional identity, resources, size and complexity.
- To examine further the nature of professional administrative staff compensation in ways indicated by the previous studies.*
- To provide these data to institutional chief executive officers in time for use in determining 1974-75 compensation arrangements.

CHARACTERISTICS OF THE RESPONSE

Invitations to participate in the study were sent to 2,775 institutions listed in the Education Directory published by the U. S. Office of Education, 1972-73, (Alaska, Hawaii, Canal Zone, Guam, Puerto Rico and Virgin Islands were excluded); of which 1050 (38 per cent) responded. The publication deadline established for the report precluded the use of some of the data submitted. Useable responses from 975 institutions are the basis for the study. For comparative purposes, the 1971-72 study included useable responses from 961 institutions.

Public institutions comprise 60 per cent of the respondents included in the study. Senior colleges account for 40 per cent of the respondents; universities for 26 per cent; and junior colleges for 34 per cent.

*College and University Personnel Association, Administrative Compensation Survey, 1967-68, 1969-70, 1971-72.

INTRODUCTION CONT'D

One of the findings of the 1967-68 study was that the size of an institution's Educational and General Budget is related in a statistically significant way to the level of salaries paid in the positions under study. For this reason, tables are presented in this report which display the salary and total compensation data on the basis of the distribution of Educational and General Budgets as shown in Table 1, below.

TABLE 1: DISTRIBUTION OF RESPONDING INSTITUTIONS ON THE BASIS OF
EDUCATIONAL AND GENERAL BUDGETS, 1973-74
(VALUE IN DOLLARS)

GROUP	MINIMUM	QUARTILE 1	MEDIAN	QUARTILE 3	MAXIMUM
ALL INSTITUTIONS	137,700	1,923,800	3,999,000	9,510,400	206,153,500
JUNIOR COLLEGES	137,700	1,240,700	2,303,300	5,326,800	37,762,900
SENIOR COLLEGES	160,000	1,871,200	3,095,900	5,173,000	89,127,600
UNIVERSITIES	373,000	7,849,300	15,854,400	33,433,900	206,153,500
PUBLICLY SUPPORTED	292,300	2,184,300	5,677,200	13,921,400	206,153,500
PRIVATELY SUPPORTED	137,700	1,675,400	2,912,100	5,500,000	160,000,000

The headcount enrollment of the institutions covered in this study ranges from a low of 83 students to a high of 50,200 students.

METHODS OF STUDY

The following methods were used in developing this study:

- Each participant was furnished with survey forms and with a summary description of each survey position (shown in Appendix A) and a set of instructions (shown in Appendix B).
- Particular attention was given to assuring comparability of data. First, as shown in the Appendices, respondents were asked to study the summary description of each position and to determine whether the position in the responding institution was sufficiently comparable to be

INTRODUCTION CONT'D

reported. Second, respondents were asked to indicate, specifically, in space following each summary description, how the position reported differed from the summary description. Third, the percentage of time each individual devoted to the position was determined; if this was less than 50 percent, the response was not included in the survey data. Fourth, each of the approximately 18,000 position responses was reviewed by the survey team, and, if there was any question of comparability, that question was resolved or the response was deleted from the study.

- Extensive use was made of long distance telephone conversations to ensure complete understanding and accuracy of responses.
- Each response was assigned a code number, and strict data security has been maintained in all phases of the study. Tables showing less than ten responses on a single item have not been included.

CONTINUING ANALYSES

All data are being retained for additional analyses and future studies. Summary tables 1A and 1B, which follow, are part of this continuing analysis and are offered here for general reference only.

PRESENTATION

The reader's attention is directed to the presentation used in this report. It is a handbook containing a sample survey of current administrative compensation in post-secondary educational institutions in the United States. It also contains helpful caveats, "how-to-use" instructions and analytical commentary.

II HOW TO USE THIS REPORT

This section presents an overview of the benefits and limitations of the report plus some suggestions on how best to employ the report in evaluating and establishing the compensation of individuals in an institution.

DEFINITIONS AND LIMITATIONS

This report can be used in evaluating and establishing the general compensation framework for the administrative positions covered provided the following definitions and limitations are understood:

- The survey was conducted during the period of October 1973--January 1974 and reflects compensation arrangements in effect or approved to be in effect at that time.
- All position compensation data are for 12 months and reflect compensation to full-time employees.
- No person is reported in more than one position.
- Since this study does not include data from all institutions of higher education, it is generally representative, but is not comprehensive. The extremes of compensation, i.e., the "Lowest" and "Highest" categories, should be interpreted as absolute only for the sample population.
- Although care has been taken to assure reasonable comparability of data on the basis of job content, variances in compensation attributable to individual performance and other factors are not considered. This limitation, alone, is sufficient to justify extreme caution in data interpretation.
- Data are presented on a national market basis.

In short, this report is a sample survey of institutions representing the entire range and spectrum of higher education. It does not take into consideration such factors as local labor market conditions, differences in the responsibilities of incumbents of similar positions in different institutions, cost of living differentials, or differences in pay which may be attributable to differences in the age, experience or performance of key individuals. To compare the actual cash salary or total compensation of an individual in an institution with the median

II HOW TO USE THIS REPORT CONT'D

or some other data element in this report and then, to make an adjustment solely on that basis would be an improper use of the data. Individual salaries should be set on the basis of three general factors: (1) the labor market, (2) the institution's ability to pay, and (3) internal consistency--the balancing of relationships among positions and individuals within the institution. This report only deals with the labor market and, to a lesser degree, with certain quantitative elements of intra-institutional position relationships.

CASH COMPENSATION

There are three ways in which this report can assist an institution in determining cash compensation for individual positions. First, it is possible to obtain a general picture of how salaries for individual positions relate to the entire sample population included in this report. Second, it is possible to make certain comparisons with generally similar institutions. Third, quantitative comparisons can be made on an intra-institutional basis to a limited extent.

Determining The General Picture

Section III of this report contains information on cash compensation. Tables 2 through 34 are useful in determining the general salary picture. The following specific steps may be taken:

- Table 2 (or in the case of a Junior College, Table 3) may be annotated to show, for each position, where the salaries of individual position incumbents within a given institution fall in the statistical array. This annotation could be in the form of placing a circle at the appropriate point in the array where the position falls or by determining the placement of the position in the array on a percentile basis.
- Table 4, which shows the range of salaries paid professional administrative staff in all institutions included in the study, may be annotated similarly to indicate whether the incumbent's cash compensation within a given institution falls below, at or above the Q1, Median or Q3 values shown in the table. The Median and interquartile range values are specifically cited so that the institution will avoid placing emphasis on the Minimum or Maximum values also shown in the table; these values are absolute only for the sample population included in this study.

II HOW TO USE THIS REPORT CONT'D

Comparisons with Generally Similar Institutions

There are four ways in which comparisons can be made with generally similar institutions:

- By comparing the salary of a given individual within an institution with the values reported for Q1, Median and Q3 in those tables presenting data on the basis of source of support (Tables 5 and 14).
- By comparing the salary of a given individual within an institution with the values reported for Q1, Median and Q3 in those tables presenting data on the basis of institutional classification as a University, Senior College or a Junior College (Tables 20, 21, and 22).
- By comparing the salary of a given individual within an institution with the values reported for Q1, Median and Q3 in those tables presenting data on the basis of a combination of source of support, institutional classification and enrollment (Tables 6-13, 15-19).
- By comparing the salary of a given individual within an institution with the values reported for Q1, Median and Q3 in those tables presenting data on the basis of institutional classifications and the size of the institution's Educational and General Budget (Tables 23-34). This is particularly significant since research has shown a high correlation between the size of the Educational and General Budget and the salary level for each position included in the report.

For best results, the above four types of comparisons should be used together.

Intra-Institutional Comparisons

Research conducted over the past several years indicates that there is a remarkable stability within institutions when the cash compensation of professional administrative staff, below the level of President, is compared with that of President. These relationships are shown in Tables 71-78 in Section V of this report. To perform a similar analysis for a single institution:

- Divide the institution's chief executive officer's salary into the salary for each other professional administrative staff position included in this report to determine the

II HOW TO USE THIS REPORT CONT'D

percentage salary relationship of each such officer to the chief executive officer.

- Compare the values produced in the preceding step with the Q1, Median and Q3 values shown in Tables 71-78.
- Justify to yourself any differences observed in the above comparison.

NON-CASH AND TOTAL COMPENSATION

The same general approach described immediately above for Cash Compensation may be used, with modification, in looking at Non-Cash and Total Compensation. The major modification is that the data on total compensation are not as reliable as those on cash compensation. Data on Social Security, retirement and insurance are sufficiently reliable to be used in general comparisons, but data on institutional contributions to housing, tuition and other benefits generally are understated. The understatement of these kinds of institutional contributions to total compensation, plus the fact that institutions place heavy reliance on cash in the total compensation picture, are sufficient to preclude serious position comparisons on the basis of total compensation.

It is recommended that only Tables 35 and 36 be used in individual position comparisons of the non-cash elements of total compensation.

III CASH COMPENSATION

This section of the report presents data on 1973-74 cash compensation paid in the 46 positions surveyed and on the trend of cash compensation in some of these positions.

1973-74 CASH COMPENSATION

The 12-month salaries paid to the 46 professional administrative positions included in this study are reflected in Tables 2 through 34 on the following pages. In all Tables, the position column number or position line number corresponds to the number of the summary position description given in Appendix A.

Greatest response was obtained for the positions of Chief Executive Officer (921), Chief Business Officer (914), Head Librarian (902), Chief Academic Officer (899), Registrar (834). Smallest response is shown in the positions of Staff Legal Counsel (60), Director/Dean, Medicine (58), Director/Dean, Architecture (55), Director/Dean, Pharmacy (43) and Director/Dean, Dentistry (38). These responses are indicative of the frequency of existence of these positions in institutions of varying size and complexity. In a few cases, respondents were reluctant to supply data on certain positions considered to be sensitive. In other instances, respondents indicated that the services of particular individuals are contributed without cost to the institution. All instances of contributed services have been excluded from the study, even when an estimate of the value of the service was given by the institution.

Tables 2-A, 2-B, 2-C, and 2-D show the arrays of all reported salaries and the average salary for each position in all institutions. These tables are provided to assist in the evaluation of the entire study and should be interpreted only in general terms. Particular care should be taken to interpret the extreme high and low figures as absolutes only for the sample population. The lowest figures reported usually represent the employment of retired individuals who wish to work full-time, but who prefer a low salary for retirement and tax purposes, or of nonprofessional staff. These data are included because cash compensation actually is paid and to indicate the existence of these types of employment.

Tables 3-A, 3-B, and 3-C show the arrays of all reported salaries and the average salary for each position in all Junior Colleges. These tables should be interpreted with the same care as mentioned for Tables 2-A, 2-B, 2-C, and 2-D above.

III CASH COMPENSATION CONT'D

Comparison of Tables 2 and 4 reveals that salary averages are higher than salary medians in the cases of all positions other than Director, Food Services and Academic Directors/Deans, indicating a skewing of these responses above the median. In the cases of Academic Directors/Deans, slightly more than half of the median salaries are higher than the salary averages, indicating a skewing of responses in the other direction.

Comparison of Tables 3 and 22 shows that salary averages for professional administrative staff positions in Junior Colleges are higher than salary medians in 33 positions and lower in 6 positions.

Tables 4-34 show, opposite each position, the number of individuals reported in that position and the range of salaries paid to the incumbents of generally comparable positions. The range is displayed in terms of the lowest salary, the first quartile, the median, the third quartile, and the highest salary. As a general guide for the interpretation of the Tables, the interquartile range (Q1--Q3) probably is most significant.

A comparison of Q1, Median, and Q3 salaries with each position between all public and all private institutional responses (Tables 5 and 14), indicates generally higher salaries in public institutions. All of the exceptions occur in the salary of the positions of Academic Director/Dean. One notable difference is the position of Director/Dean, Medicine, where the Q1, Median and Q3 salaries were substantially higher in the private institution responses. A comparison of salaries of each position in public universities of varying total headcount enrollment (Tables 6, 7, and 8) indicates that, for those positions on which such comparisons can be made, the institutions with total headcount enrollment of 10,000 and over consistently show highest salaries of Q1, Median, and Q3 categories. The same consistency is demonstrated in the responses of public universities with total headcount enrollment of 5,000-9,999 when compared with those public universities with total headcount enrollment under 5,000. A comparison of salaries of each position in private universities of varying total headcount enrollment (Tables 15, 16, and 17) shows that, for those positions with which comparisons can be made, the institutions with total headcount enrollment of 10,000 and over report higher salaries for Q1, Median, and Q3 categories than the institutions with enrollments of less than 10,000.

III CASH COMPENSATION CONT'D

The data also show (Tables 20, 21, and 22) that salary medians for positions in universities are almost always higher than salary medians for the corresponding positions in senior and junior colleges. However, a different relationship exists when senior colleges are compared to junior colleges. For many administrative positions, junior colleges reflect higher median salaries than do senior colleges. For Deans or Directors, the reverse is true.

Tables 23-34 present cash compensation data in a significant format introduced in the 1969-70 Report. In the 1967-68 study, Pearson product-moment correlation coefficients were computed between the salaries for each position and each of 32 selected variables of institutional identity, resources, size and complexity. The most significant correlations were found between salaries and the size of the institution's Educational and General Budget. This correlation does not prove causality, but shows only that a relation exists in a statistically significant way. The correlation coefficients developed in the previous study tended to refute certain commonly-held suppositions of the ways in which compensation data should be presented. One of the more standard ways to survey compensation--one used in this report--is the division of respondents between public and private institutions (source of support). Another is the classification of the institution (whether it is a university, senior college, or junior college). Still another is enrollment size which is the best predictor of the salaries of 21 of the 46 positions. However, the correlation between the size of the Educational and General Budget, and salary, is statistically significant at the .01 level for all positions, and for this reason, Tables 23-34 are presented. The Educational and General Budget dollar figures used to differentiate these tables correspond to those presented in Table 1. The combination of the several styles of presentation give the reader a substantially better picture of comparative compensation than can be obtained through any one of the presentations separately.

Comparison of Tables 23, 24, 25, and 26, which relate salaries in universities to the size of the institutional Educational and General Budget, shows a consistent relationship. For each of the positions for which such comparisons can be made, the median salary is greater in the groups of institutions having higher Educational and General Budgets.

III CASH COMPENSATION CONT'D

Comparisons of Tables 27, 28, 29 and 30 on senior colleges show a similar relationship to that explained above for universities. For those positions with which comparisons can be made, the median salary increases with the classification of the Educational and General Budget.

For junior colleges, displayed in Tables 31, 32, 33 and 34, the median salary for the position also increases with higher Educational and General Budgets.

TREND OF CASH COMPENSATION

An analysis was made of the cash compensation increases for positions in institutions found in both the 1971-72 and the present study. This analysis, covering the mean difference of each of the 46 positions included in the current study, indicates cash compensation increases over the two years in position salaries ranging from 8 per cent to 15 per cent. The median two-year per cent position salary increase for the group of 46 positions is 10 per cent. Positions receiving the highest two year per cent cash compensation increases are:

	<u>Position</u>	<u>Per Cent Increase</u>
1.	Director/Dean, Nursing	15
2.	Director/Dean, Home Economics	15
3.	Director/Dean, Social Work	14
4.	Director, Personnel Services	14
5.	Director, Information Office	13
6.	Director/Dean, Extension	13
7.	Director, Computer Center	12
8.	Comptroller	12
9.	Director, Student Financial Aid	12
10.	Chief Business Officer	11

Of the 10 positions listed above, only Director/Dean, Nursing, and Chief Business Officer appear in the similar comparison made two years ago. It is interesting to note that the two-year per cent position salary increases are generally lower than those found in the two previous studies and that the

III CASH COMPENSATION CONT'D

median position increase has fallen from 11.7 per cent to 10 per cent. It also may be significant that the position of Chief Executive Officer (President) does not appear on the list of those positions receiving salary increases at or above the median per cent increase for the entire group. The two-year per cent position salary increase for the position of Chief Executive Officer (President) is 9 per cent.

IV NON-CASH AND TOTAL COMPENSATION

The data in this section of the report reflect the nature and the value of non-cash compensation elements for 30 of the 46 positions surveyed. The basic principle of the values thus determined is that they reflect the current annual cost to the institution (or to the supporting agency) of providing the benefit. Instructions for determining the value of each element are given in Appendix B. Values have been developed for Social Security, retirement, insurance, housing, tuition and fees, and "other" benefits, such as automobile allowances, servants, and club dues.

Vacation and sick leave are specifically excluded. It is recognized that special vacation and sick leave allowances are made for some administrators, but the real cost of such benefits to an institution is debatable.

In all tables, the position column number or the position line number corresponds to the number of the summary position description given in Appendix A.

Data are presented on the frequency of occurrence of the non-cash compensation and on the percentage of total compensation that is paid in salary.

FREQUENCY OF OCCURRENCE

Institution contributions to Social Security, retirement, insurance and tuition benefits appear to be more a matter of applicability to all professional administrative staff than of individual or position considerations. The latter considerations are found more prevalent in small, private institutions. Most professional administrative staff receive, or have available to them, Social Security, retirement, and insurance benefits. The applicability of housing, tuition and fees, and "other" benefits is much more restricted.

Insurance is now the most frequently found non-cash compensation element. The study did not differentiate between types of insurance. At least one individual in each of the positions surveyed receives no insurance benefit. In the 30 positions surveyed, insurance is reported with a frequency ranging between 83 per cent and 95 per cent. This benefit occurs most frequently in universities and more frequently in senior colleges than in junior colleges.

IV NON-CASH AND TOTAL COMPENSATION CONT'D

Retirement is the second most frequently found non-cash compensation available to professional administrative staff. An average of 89 per cent of those in the 30 positions surveyed receive retirement benefits. Such benefits occur most frequently in universities and more frequently in senior colleges than in junior colleges.

Social Security is the third most frequently found benefit. Of the professional administrative staff in the 30 positions surveyed in all reporting institutions, 82 per cent receive the Social Security benefit. This benefit is found most frequently in universities and senior colleges, and significantly less frequently in junior colleges.

Housing benefits are reported most frequently for the positions of Chief Executive Officer (President) (47 per cent), Chief Academic Officer (8 per cent), Director of Physical Plant (7 per cent) and Chief Student Life Officer (6 per cent). These benefits are found least often in junior colleges and less often in universities than in senior colleges.

Tuition and fee benefits are available to professional administrative staff in 41 per cent of the institutions surveyed. When such benefits are provided, they appear to be applied to all professional administrative positions as a matter of general institutional policy. These benefits are found most often in senior colleges, slightly less often in universities and least often in junior colleges.

"Other" benefits are reported less frequently than any of the other elements of non-cash compensation except housing. When they do occur, they are reported most frequently for the positions of Chief Executive Officer (President) (39 per cent), Chief Business Officer (12 per cent), Chief Development Officer (11 per cent), Chief Academic Officer (11 per cent), Director/Dean, Medicine (10 per cent), Director/Dean, Dentistry (8 per cent), Director/Dean, Fine Arts (7 per cent), and Director/Dean, Extension (7 per cent). In all of the 30 positions surveyed, at least one person receives "other" benefits. "Other" benefits are found least frequently for junior college Chief Executive Officers (Presidents) and less frequently for the same position in senior colleges than in universities. In other positions, there is no consistent pattern of frequency of occurrence when junior colleges, senior colleges and universities are compared.

IV NON-CASH AND TOTAL COMPENSATION CONT'D

DOLLAR VALUE OF NON-CASH COMPENSATION ELEMENTS

This section reviews the dollar values of each of the elements of non-cash compensation. Instructions furnished respondents to use in determining the value of each element are given in Appendix B.

Social Security

The cost of providing Social Security benefits in 1973-74 was calculated on the basis of the calendar 1973 rules producing a maximum value of \$632 per individual.

Retirement

Table 35 shows the range of the dollar value of institutional (or supporting agency) contributions to retirement, exclusive of any contributions made to Social Security or through a tax-sheltered annuity program. At least one individual in each of the 30 positions surveyed receives no retirement benefit. The "Highest" value reported for each position reflects only the absolute high for the sample population and usually represents a special arrangement made for an individual. Special retirement arrangements are not unusual for the position of Chief Executive Officer (President), but are infrequent in other positions. The median value of retirement for a Chief Executive Officer (President) is \$2024.

Insurance

Table 36 displays the range of the dollar value of institutional (or supporting agency) contributions to all forms of individual insurance such as group life insurance, travel and accident insurance, hospital insurance, medical insurance, surgical insurance, major medical insurance, Workman's Compensation (if provided to the incumbent of the position) and long-term disability insurance. Also included in this element is any contribution through other than an insurance plan for prolonged disability income payments to an individual, provided such payments do not arise from the accumulation of unused annual sick leave or paid vacation benefits. At least one individual in each position surveyed receives no insurance benefit. The "Highest" value reported for each position reflects only the absolute high for the sample population.

IV NON-CASH AND TOTAL COMPENSATION CONT'D

Housing

The dollar value of housing, when provided, ranges as high as \$33,903 annually. This reflects the actual cost of an individual housing benefit, or the amount of cash payment provided in lieu of free or subsidized housing. Where the house is institutionally owned, the value of this element includes such costs as loss on investment (at 5 per cent), property insurance, grounds maintenance, repairs, and equipment replacement. The cost of house servants is not included, but is reported under "Other" benefits. High values for housing in excess of \$ 3,600 annually are reported for ten of the positions: Chief Executive Officer/President (\$33,903), Chief Academic Officer (\$13,850), Chief Development Officer (\$6,500), Chief Business Officer (\$6,200), Director, Physical Plant (\$4,000), Chief Student Life Officer (\$4,000), Director/Dean, Arts and Sciences (\$4,000), Director/Dean, Extension (\$4,000), Director/Dean, Graduate Programs (\$4,000), Director, Personnel Services (\$3,685).

It is quite probable that the higher values reported are the most realistic and that lower valuations developed by the institutions are apt to be understatements of institutional costs.

Tuition

The dollar value of tuition and fee benefits for one person ranges in this study from zero to \$ 4,800. Some institutions provide the benefit for more than one person. For purposes of this study, an arbitrary limit of one person was established and the benefit is reported (if available) whether or not it is used.

Other Benefits

"Other" benefits include automobile allowances, servants, club dues, and other benefits associated specifically with a position. Excluded are such items as professional memberships, travel, reimbursement of direct expenses, service club membership expenses and the like. The dollar value of "Other" benefits

IV NON-CASH AND TOTAL COMPENSATION CONT'D

of \$1,000 or more are reported for 24 of the 30 positions. Eight positions report values for "Other" benefits in excess of \$3,500 Chief Executive Officer (President) (\$26,800); Chief Business Officer (\$8,500); Chief Academic Officer (\$7,965); Chief Development Officer (\$7,208); Chief Student Life Officer (\$5,000); Director/Dean, Law (\$4,500); Director/Dean, Graduate Programs (\$4,000); and Director/Dean, Medicine (\$4,000).

The method of calculation of "Other" benefits was left to institutional discretion, as was the decision on which items to include. As in the case of housing, the values reported for this element probably are understated, and the higher values are more accurately determined.

TOTAL COMPENSATION

The totals of the cash and non-cash compensation afforded to the 30 professional administrative positions included in this portion of the study are reflected in Tables 37-69.

Tables 37-A, 37-B and 37-C show the array of total compensation and the average total compensation for each position for all reporting institutions. Tables 38-A and 38-B present the same data for all reporting junior colleges. As in the case of the salary arrays, these tables are provided to assist in the evaluation of the entire study and should be interpreted only in general terms. The extreme high and low figures should be interpreted as absolutes only for the sample population.

Comparison of Tables 37 and 39 shows that total compensation averages are higher than total compensation medians in the cases of all positions other than Academic Directors/Deans, indicating a skewing of these responses above the median. In the cases of Academic Directors/Deans a consistent skewed pattern does not occur, and in most positions the total compensation averages are lower than the total compensation medians.

Comparison of Tables 38 and 57 shows that total compensation averages for professional administrative staff positions in junior colleges are higher than total compensation medians in 20 positions and lower in 4 positions.

Tables 39-69 show, opposite each position, the number of individuals reported for that position and the range of total compensation afforded the incumbents of generally comparable

IV NON-CASH AND TOTAL COMPENSATION CONT'D

positions. The range is displayed in terms of the lowest total compensation, the first quartile, the median, the third quartile and the highest total compensation.

A comparison of Q1, Median and Q3 total compensation on each position between public and private institutional responses (Tables 40 and 49) indicates generally higher total compensations in public institutions. One notable difference is in the position of Chief Executive Officer (President) where Q1, the Median and Q3 total compensations were somewhat higher in the private institutions. Other exceptions occur only in the positions of Academic Director/Dean. An example of such an exception is the position of Director/Dean, Medicine, where the Q1, Median and Q3 totals were substantially higher in the private institutions. Other exceptions occur in the positions of Director/Dean of Architecture, Dentistry, Engineering, Technology, and Law where either the Q1, Median or Q3 total compensation is substantially higher in the private institutions.

The highest total compensation reported for a Chief Executive Officer (President) is \$100,685 in a private institution and \$95,437 in a public institution. This does not mean that the highest compensated President is in a private institution; this study does not include the total population of institutions and, therefore, the extremes of total compensation cannot be interpreted as absolutes. Neither should it be assumed that the extremes of salary and of total compensation are for the same individual.

A comparison of total compensation on each position in public universities of varying total headcount enrollment (Tables 41, 42 and 43) indicates that, for those positions on which such comparisons can be made, the institutions with total headcount enrollment of 10,000 and over consistently show highest total compensation of Q1, Median and Q3 categories. The same consistency is demonstrated in the responses of public universities with total headcount enrollment of 5,000--9,999 when compared with those public universities with total headcount enrollment under 5,000.

A comparison of total compensation of each of the three classifications of institutions (Tables 55, 56 and 57) shows that total compensation medians for positions in universities are always higher than total compensation medians for the corresponding positions in senior colleges or junior colleges.

IV NON-CASH AND TOTAL COMPENSATION CONT'D

A similar relationship exists when senior colleges are compared with junior colleges, with three notable exceptions. In the positions of Registrar, Chief Student Life Officer and Director of Personnel Services, junior colleges reflect higher median total compensation than do senior colleges.

Tables 58-69 present total compensation data by size of the reporting institutions' Educational and General Budgets. The 1967-68 study found (and the 1969-70 and 1971-72 studies confirmed) that there were statistically significant (.01 level) correlation coefficients between the salaries for each position and the size of the institution's Educational and General Budget. This correlation does not prove causality, but shows only that a relationship exists in a statistically significant way.

Comparisons of Tables 58-61, which relate total compensation in universities to the size of the Educational and General Budget, show a consistent relationship. For each of the 30 positions for which such comparisons can be made, the median total compensation is greater in the groups of institutions having higher Educational and General Budgets.

Comparisons of Tables 62-65 on senior colleges show a similar relationship to that explained above for universities. For the 10 positions on which comparisons can be made, the median total compensation increases with the classification of the Educational and General Budget with no exceptions. Comparisons of five additional positions can be made in two or three, but not all, of the budget categories. Comparisons of these five additional positions also support the correlation between total compensation and size of the institution's Educational and General Budget. For junior colleges, displayed in Tables 66-69, the median total compensation for each position increases with higher Educational and General Budgets except in the positions of Chief Executive Officer, Chief Development Officer, and Director, Personnel Services.

RELATIVE VALUE OF TOTAL COMPENSATION

Table 70 shows the results of comparing salary to total compensation in each of the institutions reporting both values.

IV NON-CASH AND TOTAL COMPENSATION CONT'D

In each case, salary is computed as a percentage of total compensation, and the range of percentages for each position is displayed in terms of the lowest for any institution, the first quartile, the median, the third quartile and the highest percentage. The table shows a continued heavy reliance on cash compensation in all positions except that of Chief Executive Officer (President).

Analyses of median data indicate that cash compensation in 29 of the 30 positions constitutes between 87 and 91 per cent of the total compensation for those positions. Only one position (President) shows a median less than 87 per cent.

The inter-quartile range of percentages remains fairly consistent among the positions surveyed. In 25 of the 30 positions, the size of the range is either 5, 6, 7, or 8 percentage points; in only one case (President) is it greater than 10 percentage points. This relatively small difference indicates that respondents tend to apply most non-cash compensation uniformly to all professional administrative staff positions and that there is little difference among most institutions in the total value of the non-cash package as a per cent of salary.

Analysis of the "Lowest" percentages indicates that a least one President receives a total non-cash benefit which is greater than his salary. At least one individual in 12 of the 30 positions receives non-cash benefits in amounts greater than 30 per cent of total compensation. Review of the "Highest" percentages shows that at least one person in 24 different positions receives no non-cash benefits at all.

Comparison of median data on salary as a percentage of total compensation in universities, senior colleges and junior colleges indicates no consistent pattern. There tends to be slightly higher non-cash compensation in universities and senior colleges than in junior colleges. This may be due to the less frequent use of retirement and Social Security benefits in the junior colleges.

Comparison of median data on salary as a percentage of total compensation in institutions of varying Educational and General Budget size produces no conclusive results. Institutions with larger budgets tend to apply non-cash compensation more uniformly to professional administrative staff than do institutions having smaller budgets.

V COMPENSATION RELATIONSHIPS

The data in this section of the report present the results of investigations of the compensation relationships among the 46 positions surveyed. In all tables, the position line number corresponds to the number of the summary position description given in Appendix A. Data are presented on intra-institutional cash compensation relationships, intra-institutional total compensation relationships and on relevant factors in administrative compensation.

INTRA-INSTITUTIONAL CASH COMPENSATION RELATIONSHIPS

In most institutions, the salary of the Chief Executive Officer (President) sets the ceiling for all salaries. There are a few cases where the President donates all or some of his services. In still other instances, the salary of the President is established by law, whereas other salaries in the same institution are not. As a result, there are a few institutions in which the top salary is paid to someone other than the President. However, in most institutions, the best indicator of the level of the administrative salary policy of the institution, and to some degree, of its ability to pay, is the President's salary.

All Institutions

Table 71 shows the results of comparing all salaries to the President's salary in each of the 921 institutions reporting the value of the President's salary. All relationships thus developed are expressed as an index, with the President's salary index set at 100. The range of indices for each position is displayed in terms of the lowest index in any institution, the first quartile, the median, the third quartile and the highest index.

"Highest" and "Lowest" indices should be interpreted as absolutes only for the sample population. Due to the characteristics of this study, the inter-quartile range and the median are more reliable indicators of the current situation.

Analysis of Table 71 median indices indicates that, regardless of the salary of the Chief Executive Officer (President) and where such positions exist, the next highest paid administrators (exclusive of Academic Directors/Deans) are likely to be (in descending order): the Chief Academic Officer, the Chief Business Officer, the Chief Development Officer and the Chief Student Life Officer. This relationship is the same as that found in the previous two studies.

V COMPENSATION RELATIONSHIPS CONT'D

Moreover, the indices for these four positions vary by not more than two index points in comparisons made between the reports of 1969-70, and 1971-72. In the cases of Academic Directors/Deans, analysis of Table 71 median indices indicates that, regardless of the salary of the Chief Executive Officer (President), and where such positions exist, these positions will rank in the following descending order: Medicine, Law, Dentistry, Agriculture, Education, Engineering, Arts and Science, Graduate Programs, Business, Pharmacy, Vocational Education, Fine Arts, Technology, Social Work, Architecture, Extension, Home Economics, Music, and Nursing.

The inter-quartile range of salary indices has remained relatively consistent over four biennial studies. In 32 of the 46 positions, the size of the inter-quartile range is 14, 15, 16, 17, or 18 index points. In the professional administrative staff positions (exclusive of Academic Directors/Deans), 12 of the 27 positions show an inter-quartile range of 14, 15, or 16 index points. In the cases of the Academic Directors/Deans, 11 of the 19 positions show an inter-quartile range of 14, 15, or 16 index points. The inter-quartile range point spread appears to be decreasing slightly over time.

Universities

Table 72 shows the intra-institutional salary relationships in 242 universities developed in the same manner as for all institutions. Analysis of median indices of salaries in universities indicates that, regardless of the salary of the Chief Executive Officer (President), and where such positions exist, the next highest paid administrators (exclusive of Academic Directors/Deans) are likely to be (in descending order): The Chief Academic Officer, the Chief Business Officer, the Chief Student Life Officer, and the Chief Development Officer. In half of the cases, the Chief Academic Officer's salary is from 78 to 89 per cent of that of the President.

In 27 of the 46 positions, the size of the inter-quartile range is either 12, 13, 14, or 15 index points.

Senior Colleges

Table 73 displays the intra-institutional salary relationships in 351 senior colleges developed in the same manner as for all institutions. Analysis of median indices of salaries in senior colleges indicates that, regardless of the salary of the

V COMPENSATION RELATIONSHIPS CONT'D

Chief Executive Officer (President), and where such positions exist, the next highest paid administrators (exclusive of Academic Directors/Deans) are likely to be (in descending order): the Chief Academic Officer, the Chief Business Officer, the Chief Development Officer, and the Chief Student Life Officer. This relationship is identical to that found in the previous two studies. In half of the cases, the Chief Academic Officer's salary is from 70 to 86 per cent of that of the President.

In 18 of the 39 positions, the size of the inter-quartile range is either 14, 15, 16, 17, or 18 index points.

Junior Colleges

Table 74 shows the intra-institutional salary relationships in 328 junior colleges developed in the same manner as for all institutions. Analysis of median indices of salaries in junior colleges indicates that, regardless of the salary of the Chief Executive Officer (President), and where such positions exist, the next highest paid administrators (exclusive of Academic Directors/Deans) are likely to be (in descending order): the Chief Academic Officer, the Chief Business Officer, the Chief Student Life Officer, and the Chief Development Officer. This relationship is identical to that found in the previous two studies. In half the cases, the Chief Academic Officer's salary is from 71 to 85 per cent of that of the President.

In 19 of the 39 positions, the size of the inter-quartile range is 15, 16, 17, or 18 index points.

Educational and General Budget Impact

One of the purposes of this study is to display the impact of the size of the Educational and General Budget of an institution in terms of the intra-institutional cash compensation relationships. Analysis of Tables 75-78 indicates that the Chief Academic Officer is consistently the second highest paid administrative officer under the President exclusive of Academic Directors/Deans. The third highest paid officer is the Chief Business Officer. The fourth highest paid officer is either the Chief Development Officer or the Chief Student Life Officer, with the later taking the fourth position in those institutions having extremely large Educational and General Budgets.

V COMPENSATION RELATIONSHIPS CONT'D

Analysis of median salaries in these same tables, therefore, indicates that there is a relationship in the "pecking order" of position salaries and the size of the Educational and General Budget. It is not a consistent relationship although it is reasonably stable.

INTRA-INSTITUTIONAL TOTAL COMPENSATION RELATIONSHIPS

As in the case of salary, the total compensation of the Chief Executive Officer (President) sets the ceiling for the total compensation of all other positions in most institutions. Tables 79-86 develop comparative indices for total compensation in the same manner as for salaries in the preceding section. Similarly, the inter-quartile range and the median are also more reliable indicators of the present situation than are the "Highest" and "Lowest" indices.

All Institutions

Table 79 shows the intra-institutional total compensation relationships developed for the 921 institutions reporting the value of the President's total compensation. Analysis of the median indices indicates that, regardless of the total compensation of the Chief Executive Officer (President), and where such positions exist, the next highest administrators (exclusive of Academic Directors/Deans) are likely to be (in descending order): the Chief Academic Officer, the Chief Business Officer, the Chief Student Life Officer and the Chief Development Officer. In half the cases, the Chief Academic Officer's total compensation is from 66 to 82 per cent of that of the President. Furthermore, the indices for these four positions vary by not more than two index points when compared to similar indices in the 1971-72 study and by not more than three index points when compared to similar indices in the 1969-70 study.

The inter-quartile range of total compensation indices remains relatively consistent. In 18 of the 30 positions, the size of the inter-quartile range is 16, 17, or 18 index points. In the professional administrative staff positions (exclusive of Academic Directors/Deans) 7 of the 11 positions show an inter-quartile range of 16, 17, 18, or 19 index points. In the cases of the Academic Directors/Deans, 12 of the 19 positions show an inter-quartile range of 16, 17, or 18 index points.

V COMPENSATION RELATIONSHIPS CONT'D

Universities

Table 80 shows the intra-institutional total compensation relationships in 242 universities developed in the same manner as for all institutions. Analysis of median indices of universities indicates that, regardless of the total compensation of the Chief Executive Officer (President), and where such positions exist, the next highest administrators (exclusive of Academic Directors/Deans) are likely to be (in descending order): the Chief Academic Officer, the Chief Business Officer, the Chief Student Life Officer, and the Chief Development Officer. This relationship is identical to that found in the previous two studies. In half of the cases, the Chief Academic Officer's total compensation is from 67 to 85 per cent of that of the President. In 17 of the 30 positions, the size of the inter-quartile range is either 16, 17, 18, 19 or 20 index points.

Senior Colleges

Table 81 displays the intra-institutional total compensation relationships in 351 senior colleges developed in the same manner as for all institutions. Analysis of median indices of the total compensations in senior colleges indicates that, regardless of the total compensation of the Chief Executive Officer (President), and where such positions exist, the next highest administrators (exclusive of Academic Directors/Deans) are likely to be (in descending order): the Chief Academic Officer, the Chief Business Officer, the Chief Development Officer, and the Chief Student Life Officer. This relationship is identical to that found in the previous two studies. In half of the cases, the Chief Academic Officer's total compensation is from 64 to 79 per cent of that of the President. In 14 of the 24 positions, the size of the inter-quartile range is either 15, 16, 17, or 18 index points.

Junior Colleges

Table 82 shows the intra-institutional total compensation relationships in 328 junior colleges developed in the same manner as for all institutions. Analysis of median indices indicates that, regardless of the total compensation of the Chief Executive Officer (President), and where such positions exist, the next highest paid administrators (exclusive of Academic Directors/Deans) are likely to be (in descending order): the Chief Academic Officer, the Chief Business

V COMPENSATION RELATIONSHIPS CONT'D

Officer, the Chief Student Life Officer, and the Chief Development Officer. In half of the cases, the Chief Academic Officer's total compensation is from 69 to 83 per cent of that of the President. In 15 of the 24 positions, the size of the inter-quartile range is 14, 15, 16, 17, or 18 index points.

Educational and General Budget Impact

Analysis of Tables 83-86, which display the impact of the size of the Educational and General Budget of an institution in terms of the intra-institutional total compensation relationships, indicates that the Chief Academic Officer remains consistently the second highest paid administrative officer under the President, exclusive of Academic Directors/Deans. The third highest paid officer remains the Chief Business Officer. This relationship is similar to that found earlier when intra-institutional cash compensation relationships were compared on the basis of the Educational and General Budget. This sameness reflects the heavy reliance on cash in the total compensation package.

V COMPENSATION RELATIONSHIPS CONT'D

RELEVANT FACTORS IN ADMINISTRATIVE COMPENSATION

A major purpose of this study was to determine the extent of correlation between the salaries of the 46 surveyed positions and each of four selected indicators of institutional identity, resources, size and complexity: (1) classification of the institution, (2) source of support (public or private), (3) total headcount enrollment, and (4) the size of the current Educational and General Budget.

These four indicators were selected from among 32 examined in the 1967-68 study as having the strongest relationship to salary and, therefore, deserving of more critical examination in this broader study. The same indicators were used in the previous two studies.

Pearson product-moment correlation coefficients were computed to measure the strength of the linear relationship between each of the 4 indicators and the salary of each position. These relationships form the basis for the following comments. The reader should not assume that correlation proves causality. These data show only that a relationship exists, and not that one variable has a causal relationship to another.

Best Predictor of the President's Salary

The factor considered in this study which best predicts the distribution of the salaries of college and university Chief Executive Officers (Presidents) is the size of the Educational and General Budget of the institution. The coefficient of correlation between Presidents' salaries and the size of the Educational and General Budgets is 0.57. Therefore, 32 per cent of the differences among Presidents' annual salaries is predictable by this factor. The correlation has slightly less strength this year than in the 1971-72 study in which the correlation coefficient was 0.59, with 35 per cent of the differences predictable.

Best Predictors of Other Salaries

The best predictors of the distribution of salaries of the 45 positions other than that of the President were found to be

V COMPENSATION RELATIONSHIPS CONT'D

the size of the Educational and General Budget, total headcount enrollment, and the classification of the institution.

The size of the Educational and General Budget of an institution is the best indicator of the Chief Academic Officer and the salaries of 13 other top administrative positions including 4 of the Academic Directors/Deans. Table 87 shows the correlation coefficients of the position salaries and the Educational and General Budget. The correlation between the size of the budget and salary is statistically significant at the .01 level for all positions surveyed.

Total headcount enrollment was found to be the best single indicator of the salaries of the Registrars and the Directors of many student-related functions, i.e., student union, student placement, student financial aid, student counseling, etc. Total headcount enrollment was found to be the best single indicator of the salaries of 21 different positions.

The institution's classification as a university, senior college or junior college was found to be the best indicator of salaries for 8 positions, all of which are Academic Directors/Deans.

Conclusions

The size of the Educational and General Budget still emerges as the best single indicator of salary differences for the administrative positions surveyed, although its importance has declined slightly since the 1971-72 study. The budget factor is not the best indicator of salary differences in all positions, but the difference in correlation coefficients between this factor and the best indicator is less than .15 in all cases except two.

Continued use of data presentation formats which are geared to the size of the Educational and General Budget appears not only desirable, but also necessary to ensure maximum understanding and usefulness of administrative compensation survey data. Of course, no such quantitative relationships can substitute for informed and balanced judgement in determining the compensation of an individual.

- B. Instructions for Completion of Administrative Compensation Survey
- C. Survey Form 1973-74

APPENDIX A:

SUMMARY POSITION DESCRIPTIONS

Please review these summary position descriptions before entering compensation figures in order to ensure reasonable comparability of survey data. When the differences between the summary description and the duties actually performed in the responding institution are substantial, no data should be reported. However, when the differences between functions actually performed and the summary description are not thought to be sufficiently great as to destroy comparability, data should be reported and the nature of the difference noted (hand-written) in the space provided with the summary description.

1. President (Chief Executive Officer): The principal administrative official responsible for the direction of all operations of an institution of higher education. Usually reports to a governing board.

Position comparable except as follows:

2. Chief Academic Officer: The senior administrative official responsible for the direction of the academic program of the institution. Functions typically include teaching, research, extension, admissions, registrar and library activities.

Position comparable except as follows:

3. Registrar: The administrative official with principal responsibility for student admissions and records. Functions typically include undergraduate admissions, classroom scheduling, maintenance of student records and related matters.

Position comparable except as follows:

4. Director of Admissions: The administrative official with primary responsibility for the admission of undergraduates. may also be responsible for the admission of graduate and professional students, or for scholarship administration or similar functions.

Position comparable as follows:

5. Head Librarian: Directs the activities of all institutional libraries. Functions typically include selection and direction of professional staff, acquisitions, technical services, audiovisual services, special collections, and may include the direction of a school of library science.

Position comparable except as follows:

6. Director, Computer Center: Directs the institution's major computing activities. Functions typically include computer programming, systems studies and computer operations.

Position comparable except as follows:

7. Director, Community Services: Directs or coordinates the conduct of special (usually non-credit) educational, cultural and recreational services to the community.

Position comparable except as follows:

8. Chief Business Officer: The senior administrative official responsible for the direction of business and financial affairs. Functions supervised typically include purchasing, physical plant management, property management, auxiliary enterprises, personnel services, investments, budgeting, accounting and related matters.

Position comparable except as follows:

9. Purchasing Agent: Conducts central purchasing operations for the institution. Functions typically include preparation of specifications, contracting, bidding, receiving and stores, approval of invoices and related matters.

Position comparable except as follows:

10. Director, Personnel Services: Administers institutional personnel policies and practices for faculty and staff. Functions typically include personnel records, benefits, staff employment, wage and salary administration and, where applicable, labor relations.

Position comparable except as follows:

11. Director, Physical Plant: The senior administrative official responsible for the construction, rehabilitation and maintenance of physical facilities. Functions typically include supervision of new construction and remodeling, grounds and building maintenance, power plant operation, parking and campus security.

Position comparable except as follows:

12. Director, Food Services: Administers all institutional food services whether directly managed and operated or catered.

Position comparable except as follows:

13. Comptroller: Directs accounting, payroll, cashiering and related functions. May also have responsibility for office services, such as mail and telephone.

Position comparable except as follows:

14. Director, Student Housing: Directs all residence hall operations for students. May also administer off-campus housing programs.

Position comparable except as follows:

15. Manager, Bookstore: Directs the operation of the campus bookstore, usually under the direction of the Chief Business Officer. Functions typically include purchase and sale of new and used books, supplies and equipment; advertising; employment and supervision of sales staff; maintenance of sales and inventory records, and related matters.

Position comparable except as follows:

16. Staff Legal Counsel: The principal salaried staff person responsible for advising the institution on its legal rights, obligations or privileges. May act as agent in various transactions or serve as principal contact with other legal counsel. (Do not report unless on institution's payroll.)

Position comparable except as follows:

17. Chief Development Officer: The senior administrative official responsible for institutional development programs. Functions typically include fund-raising and, in the absence of an organizational co-equal specifically assigned to the function, public relations, alumni relations and information office activities.

Position comparable except as follows:

18. Chief Public Relations Officer: The senior administrative official responsible for public relations programs. Functions typically include public relations, legislative relations, alumni relations and information office functions.

Position comparable except as follows:

19. Director, Information Office: Directs the provision of information about the institution to students, faculty and the public. Functions typically include news media regulations, preparation or review of news releases and photographs, and preparation and distribution of news letters, magazines and other publications.

Position comparable except as follows:

20. Chief Student Life Officer: The senior administrative official responsible for the direction of extra-curricular student life programs. Functions typically include student counseling and testing, student placement, student union, relationships with student organizations and related functions.

Position comparable except as follows:

21. Director, Student Union: Directs the operation of a student union building and related student activities. Functions typically include supervision of food service facilities, activities programming, guest rooms, information desk, recreational facilities and arrangements for special functions or activities.

Position comparable except as follows:

22. Director, Student Placement: Directs operation of a student placement office to provide job placement and counseling services to undergraduates, graduates, and alumni. May also be responsible for placement of students on part-time jobs within or outside the institution.

Position comparable except as follows:

23. Dean of Men: Directs the student life activities solely concerned with male students. Functions typically include fraternity relations, male discipline, and related matters.

Position comparable except as follows:

24. Dean of Women: Directs the student life activities solely concerned with female students. Functions typically include sorority relations, female discipline, and related matters.

Position comparable except as follows:

25. Director, Student Financial Aid: Directs the administration of all forms of student aid. Functions typically include assistance in the application for loans or scholarships; administration of private, State or Federal loan programs; awarding of scholarships and fellowships, and maintenance of appropriate records.

Position comparable except as follows:

26. Director, Student Counseling: Directs the provision of counseling and testing services for students.

Position comparable except as follows:

27. Director, Athletics: Directs intramural and intercollegiate athletic programs. Functions typically include scheduling and contracting for athletic events, employment and direction of athletic coaches, publicity, ticket sales, and equipment and facilities maintenance.

Position comparable except as follows:

- 28-
46. Dean or Director: Serves as the principal administrator for the degree-credit instructional program indicated (i.e., Architecture, Agriculture, Arts & Sciences, etc.).

APPENDIX B:

INSTRUCTIONS FOR COMPLETION OF ADMINISTRATIVE
COMPENSATION SURVEY

The following sections describe how to complete the 1973-74 Administrative Compensation Survey.

GENERAL INSTRUCTIONS

The purpose of the survey is to determine the cash compensation for 46 administrative positions found in colleges and universities and the non-cash and total compensation for 30 of that group, including 19 academic Deans and Directors.

To assist in the identification of the position in the responding institution, a summary description of each position is included with these instructions. Please review and comment on the summary position description before completing the survey document.

Do not report data for persons (1) who devote less than 50 per cent of full-time to the survey position, or (2) whose services are wholly or partially contributed without compensation, or (3) who devote more than 50 per cent of full-time to multi-campus, system headquarters duties.

Please report figures to the nearest whole dollar and fill in all blanks.

I INSTITUTIONAL IDENTIFICATION

Items 1 through 5 are self-explanatory. In Item 6: 1973-74 Educational and General Budget, enter the dollar value of that portion of the total institutional budget used for current educational and general operations exclusive of student aid, auxiliary enterprises, service departments, construction, and externally sponsored research and other activities.

II DOLLAR VALUES OF NON-CASH COMPENSATION ELEMENTS

Instructions for columns (a) through (h) appear in the following sections. The basic principle of these calculations is that they should reflect the cost to the institution or to the supporting

agency (such as to the state for a public institution) of providing the benefit.

- (a) Position Number: refers to number of position as shown in attached Summary Position Descriptions.
- (b) Title or Function: refers to title or function of position as shown in attached Summary Position Descriptions.
- (c) Social Security: indicate by entering "Yes" or "No" whether incumbent of position is covered by Old Age and Survivors Insurance.
- (d) Retirement: report the actual cost of the employer's contribution to all retirement plans other than Social Security, but including the current annual cost of special deferred compensation arrangements designed for application during retirement. Exclude the employee's contribution to a tax-sheltered annuity plan (which should be included in Section III with "12-Months Salary").
- (e) Insurance: report the actual direct cost of providing insurance for the individual. Include such coverage as group life insurance, travel and accident insurance, hospital insurance, medical insurance, surgical insurance, major medical insurance, Workmen's Compensation (if provided to the incumbent of the position) and long-term disability insurance. Also include in this section any contribution through other than an insurance plan for prolonged disability income payments to the individual, providing such payments do not arise from the accumulation of unused annual sick leave or vacation benefits.
- (f) Housing: report the actual cost of any individual housing benefit, or the amount of cash payment provided in lieu of free or subsidized housing. If house is institutionally owned, include such costs as loss on investment (at 5 per cent), property insurance, grounds maintenance, repairs, and equipment replacement. Exclude here the cost of house servants, which should be reported under "Other Benefits".
- (g) Tuition and Fees: report the in-state tuition and fees normally charged to one full-time student if such benefits normally are available to the incumbent of such a position. It is not necessary for the individual to actually be receiving this benefit to have it reported.
- (h) Other Benefits: report the total actual cost to the institution or agency for all other benefits, such as:
 - Automobile allowance--including the estimated cost of depreciation, insurance on the automobile, loss of interest

on investment (at 5 per cent), or rental cost, and estimated operating costs.

- Servants--at actual cost including the institutional portion of Social Security taxes and other benefits.
- Club Dues--actual cost of dues and initiation fees paid in the name of the incumbent.
- Other additions to cash compensation at their annual institutional cost.
- Do not include such items as professional memberships, travel, reimbursement of direct expenses, service club membership expenses and the like.

III CASH COMPENSATION

- (i) Per Cent: enter the per cent of time the individual devotes to the function (do not report assignments of less than 50 per cent of full-time). Indicate the assignment of a single individual to more than one function through the use of footnotes.
- (j) 12-Months Salary: report the 12-months equivalent cash salary of the individual. This may require conversion of 9, 10 or 11-month salaries. Report only gross salary before reduction for a tax-sheltered annuity.

PRICE OF REPORT

All CUPA member institutions, as of April 1, 1974, receive one copy of this report as a membership service of the Association. Additional copies are available to CUPA member institutions at a charge of \$5.00 per copy.

Other prices are as follows:

- Institutions which have been accepted for CUPA membership after April 1, 1974: \$5.00/copy.
- Non-member educational institutions: \$7.00 per copy.
- All others: \$10.00 per copy.
- Quantity discount for ten or more copies: 10%.
